# H2893/1

## 3.0 tonne 2 post hydraulic single ram lift

### Features

- Single phase version available
- 3.0 tonne lifting capacity
- Electromechanical locking device in case of rope failure
- Anti-toe protection guards
- Single screw pad
- Overload safety-device
- Descent valve
- Parachute valve
- Dead man controls 24V
- Electrically controlled mechanical safety device
- Mechanical synchronisation
- Full range of lifting adaptors

### Technical data

- |                |   |
|----------------|---|
| Voltage        | 230-400v/50Hz - Three phase   |
| Motor rating   | 2.2kW - 3ph   |
| Operation      | Electro-hydraulic   |
| Capacity       | 3000kg  |
| Weight         | 630kg   |
| Lift/lower     | 45 seconds  |
| Lifting height | 1920mm  |
| Pad height     | 100mm   |
| Pad extensions | 60mm 100mm 170mm  |
| Concrete       | 35N/mm <sup>2</sup> strength continuous slab<br>150 mm minimum thickness<br>Withstand 3.0 tonne static load<br>Withstand 6.0 tonne shock load |
